

LWDA #14 SHARE Network Access Points (SNAPs)

A SHARE Network Access Point is a faith-based or community organization where people can go in their own neighborhoods or communities to look for jobs, assisted by trained individuals who connect them to the One-Stop system via computer and direct referrals. It is the training, and the ongoing relationship with the One-Stop, that characterizes SHARE Network Access Points as unique.

SHARE Network Access Points provide customers a comfortable place to conduct their own self-directed job search activities, supported by a trained individual who can help them become more comfortable using the computer, completing job applications, creating resumes, and connecting to other services for which they may be eligible.
